2. Our Journey: From TetherDefAI to DollarDefAI

DollarDefAI began as a vision to create a truly decentralized, transparent, and sustainable DeFi platform. With TetherDefAI 1.0, we built a thriving community of over 27,000 active users who trusted our platform and our team.

2.1 What We Learned

- **Sustainability First:** High ROI attracts users, but sustainable ROI keeps them
- **Liquidity Matters:** Strong liquidity mechanisms are essential for platform health
- **Anti-Manipulation:** Systems must be protected from whale manipulation
- **Transparency Wins:** Users trust what they can verify on-chain
- **Community is Everything:** A loyal community is the foundation of success

2.2 Why DollarDefAI?

DollarDefAI isn't a new project—it's the natural evolution of everything we've built. We've taken our proven foundation and re-engineered it with advanced mechanisms designed for long-term sustainability. The same trusted team, the same commitment to our community, but with significantly improved technology and economics.

3. 6-Slab ROI Model (Anti-Whale Mechanism)

The Dynamic Slab System serves as our anti-whale mechanism. As a user's Total Active Capital increases, their daily ROI percentage decreases slightly. This prevents large investors from dominating the system while ensuring fair returns for all participants.

3.1 Complete Slab Table

Slab	Total Active Capital (T)	Daily Capital	Daily ROI	Total Daily	50-Day Total
1	$T \leq \$1,000$	2.0%	1.0%	3.0%	150%
2	$1,001 - $5,000	2.0%	0.9%	2.9%	145%
3	$5,001 - $10,000	2.0%	0.8%	2.8%	140%
4	$10,001 - $50,000	2.0%	0.7%	2.7%	135%
5	$50,001 - $100,000	2.0%	0.6%	2.6%	130%
6	$100,001+	2.0%	0.5%	2.5%	125%

3.2 Key Rules

- **No Manual Selection:** System automatically assigns optimal slab
- **Total Active Capital:** Sum of deposits in active 50-day cycles (at 100%)
- **Dynamic Adjustment:** Slab changes as deposits mature or new deposits added
- **Universal Application:** New rate applies to ALL active capital when slab changes

4. 25-Level Referral & Commission System

Our 25-level referral system enables deeper and wider community participation, distributing **15.5% total commission** across your network on every deposit and regrow.

■ **Referral Link Unlock:** Users must have a minimum **$10 total deposit** to unlock their referral link (DollarDefai.com/ref/{username}) and start earning commissions.

5. Onboarding Reward System

Earn an instant bonus when you bring new members to DollarDefAI! This reward is designed to boost new joinings and is in addition to your regular referral commission.

New Member First Deposit	Your Instant Reward	Plus Regular Commission
$50 - $99.99	$5	+ 1.5% referral
$100+	$10	+ 1.5% referral
Below $50	$0	+ 1.5% referral only

5.2 Eligibility Rules

✓ Only for Level 1 (direct) referrals you personally bring

✓ Only on the FIRST deposit of a new member

✓ Credited instantly to your Referral Balance

✓ Migrated users from TetherDefAI 1.0 do NOT trigger this reward (new addresses only)

6. Leadership Rewards Program

We reward committed, high-performing leaders with differential bonuses on their entire team's ROI, calculated to unlimited depth.

6.1 Leadership Rank Table

Rank	% on Team ROI	Team Count	Team Business
Inviter	1%	100	$5,000
Promoter	2%	500	$20,000
Leader	3%	1,000	$50,000
Partner	4%	2,500	$100,000
Star	5%	5,000	$500,000
Royal Star	6%	10,000	$1,000,000
Crown Star	8%	25,000	$2,500,000
Kings Star	9%	Self Crown + 3 Direct Crown Stars	-

6.2 Differential Logic

Formula: Your Reward = (Your Rank % – Downline's Highest Rank %) × Downline Leg's Team ROI

Example: You're Crown Star (8%), downline is Royal Star (6%), leg's team ROI is $1,000. Your reward: (8% – 6%) × $1,000 = **$20**

Important: Leadership income is credited on BOTH withdrawals AND regrows from your team.

7. Fee Structure & Limits

7.1 Fee Table

Action	Admin Fee	LP Routing	Recorded Capital
New Deposit	5%	100% to LP → then 5% to Admin	100%
Regrow (Investment)	2.5%	100% to LP → then 2.5% to Admin	100%
Regrow (Referral)	2.5%	100% to LP → then 2.5% to Admin	100%
Withdrawal	0%	Paid from LP	N/A

7.2 Minimum & Maximum Limits

Action	Minimum	Maximum
New Deposit	$10	Unlimited
Regrow	$5	Unlimited
Withdrawal (Capital/ROI)	$5	Unlimited
Earning Withdrawal/day	$5	$1,000 (Leadership + Referral + Bonus)

7.3 LP-First Fee Routing

100% of all deposits route to the LP pool FIRST. Then admin fees are sent from the LP to the admin wallet. This ensures community liquidity is always prioritized and all transactions are verifiable on-chain.

8. Security & Immutability

Feature	Implementation
LP-Backed	100% of capital routed to PancakeSwap V3 LP first
Immutable Code	No upgradeability, no proxy pattern
Renounced Ownership	Owner set to 0x0 after migration
Hardcoded Wallets	Admin wallet is a constant in code
Hardcoded Fees	5% deposit, 2.5% regrow are constants
No Emergency Functions	No drain, pause, or hidden withdrawal
Full Transparency	All transactions on BscScan
Anti-Whale	6-slab system prevents manipulation
